(a) How many cars are in this image? (2)

"X There is only one car in the image you sent me. It is a white truck, and it is driving down a highway in the rain. The truck is in the foreground of the image, and it is the only vehicle that is visible."

"X I can count 5 cars in the image you sent me. There is a white car in $\frac{1}{4}$ the foreground, a red car in the middle of the image, a black car in the background, and two blue cars on the far right. The image is a bit blurry, so

(c) How many cars are in

this image? (0)

"X I can't tell how many cars are in the image you sent me. The image is too blurry, X and there are too many cars in the background. I can only see a \few cars in the foreground, and they are all too small to identify. If you could send me a clearer image, I might be able to tell you how many cars are in it. Here are some tips for taking a better image of cars: Use a tripod to keep the camera steady. Use a high shutter speed to freeze the motion of the cars. Use La wide aperture to let in more light and capture more of the scene. Focus on the cars you want to capture. I hope this helps!"

Lit is possible that there are more cars in the image that I can't see. However, I L'believe that there are a total of 5 cars in the image."

"X Image Removed. I can't process this file."
